Ramsey s theorem Wikipedia

January 15th, 2019 - In 1997 McKay Radziszowski and Exoo employed computer assisted graph generation methods to conjecture that $R(5, 5) = 43$ They were able to construct exactly 656 $(5, 5, 42)$ graphs arriving at the same set of graphs through different routes None of the 656 graphs can be extended to a $(5, 5, 43)$ graph For $R(r, s)$ with $r, s \geq 5$ only weak bounds are available

Geometric Series from Wolfram MathWorld

January 8th, 2019 - Geometric Series A geometric series is a series for which the ratio of each two consecutive terms is a constant function of the summation index The more general case of the ratio a rational function of the summation index produces a series called a hypergeometric series For the simplest case of the ratio equal to a constant the terms are of the form

Applications of Graph Theory Four Color Theorem
